Partner – Creative Developer

Partner of a boutique, remote creative studio focused on building bespoke, design-forward websites. Client projects span e-commerce, editorial, cultural work.

- Lead end-to-end projects from concept to launch
- Blend code and design fluently, building with Svelte, React, Craft CMS, and more
- Collaborate with global teams across disciplines

Creative Developer

Independent and collaborative work for cultural and creative clients.

- Designed and developed custom websites and interactive features
- Emphasis on animation, smooth UX, and creative code

Product Designer and Developer

- UI/UX design and frontend development for a version control platform for designers
- Prototyped features and helped shape product direction

Product Designer and Developer

- Assisted with the design and implementation of a full website redesign.
- Completed a mobile website redesign, which was implemented after my departure.

Product Designer and Developer

- As first employee, helped shape the product together with the CPO.
- Maintained a flexible role, adapting to the needs of the company and the users.
- Responsibilities included product strategy, visual design, UI/UX design, interaction design, metrics and web development.

Web Design Internship

- Designed and built a fully responsive Wordpress website using custom webfonts — cutting-edge at the time!
- Gained foundational experience in web typography, grid systems, and visual hierarchy

Bachelor of Science in Visual Communication

- Graduated magna cum laude. Focus on Swiss modernism, typography, and digital/analog design foundations.
